

2014 Highlife® Collection & Highlife Collection NXT Spas

Grande™ NXT spa shown with Ice Grey shell / Monterey Grey cabinet

Design Innovation

The new 2014 Highlife® Collection and NXT models were designed with help from the experts at **BMW Group DesignworksUSA**. Using a blank canvas approach, DesignworksUSA provided concept ideation and refinement throughout the development of this exclusive line of spas. The Hot Spring® Spas design team's skills, combined with the innovative input from DesignWorksUSA, culminated in a revolutionary new spa design.

HotSpring®

Every day made better™

2014 Highlife® Collection

Good Design is Functional Design

With meticulous attention to detail, **BMW Group DesignworksUSA's** approach ensured an integrated spa design. Even the smallest elements have been considered, not only for how they look, but also for how they enhance your experience. The Highlife Collection now offers the most comfortable seating possible, more useful bartop space, jets that are easier to adjust, and the added convenience of a touchscreen wireless remote control (on select models).

Simple, elegant and functional, Highlife Collection spas add beauty to your back garden, and seamlessly integrate into your life.

Everwood™ HD Siding

Our Everwood HD siding features a **richer, high definition wood grain** in **contemporary colours** to enhance the look of your spa from the home or back garden. Our latest siding **innovation** continues to deliver on our original Everwood promise of **low-maintenance** and **durability**.

Beautiful, Comfortable Shells

All Highlife Collection spa shells are **spacious** and **help keep water in the spa**. Every seat **comfortably cradles** your body, while the **elegant bartop** leaves **ample room for drinks**. Style lines provide added flair and the matching **footwell pattern** feels great on bare feet.

Contemporary Cabinet and Shell Colour Option

The colour, finish, and materials experts at **BMW Group DesignworksUSA** helped us carefully select a distinctive palette of cabinet, shell and cover colour options. The unique colours have broad appeal – ranging from traditional to modern tastes.

Shell Colours:

Alpine White

Crème

Ice Grey

Desert

Everwood HD Cabinet Colours:

Tuscan Sun

Mocha

Monterey Grey

Teak

2014 Highlife Collection Spas

These thoughtful design elements enhance the way your spa looks and performs.

Comfortable pillows accent the spa and provide the perfect amount of support, plus they can be reversed to accommodate people of different heights.

The exclusive BellaFontana™ water feature creates three elegant backlit arches of water – a beautiful fountain that can be enjoyed from inside or outside the spa.

At each corner, a waterfall-like detail gives the impression that the shell is flowing over the cabinet, and helps visually integrate the shell and cabinet.

The exclusive Moto-Massage™ DX jet delivers an unparalleled back massage and now features a louvered, two-tone design that allows light to shine through, colourfully illuminating your spa.

Wireless Remote Control

(Only available on all Highlife NXT and Highlife Collection Envoy™ and Grandee™ models)

Our exclusive and innovative **Wireless Remote Control** (available in 13 languages, including English) lets you conveniently adjust spa functions from anywhere inside the spa, and up to 9 m outside the spa – a great way to control lighting and music when entertaining in the back garden. Using innovative touchscreen technology, this advanced control panel provides a series of simple and easy to navigate menus.

The wireless remote control panel charges while resting in the bartop docking station, or can be placed in a secondary resting station also molded into the bartop, while you relax in the spa.

Grandee spa with Alpine White shell / Mocha Everwood HD cabinet.

The louvered weir makes this typically functional component an attractive design element. Select models only.

Jets throughout each hot tub feature a modern design that combines the beauty of stainless steel with molded plastic, making them easier to adjust underwater.

Highlife® Collection NXT models The Next Generation of Spa Design

With input from **BMW Group DesignworksUSA**, the stunning new Highlife Collection NXT spas – Grandee™ NXT, Envoy™ NXT and Jetsetter™ NXT – **represent the future of spa design.**

Highlife NXT spas offer many of the same features and experience as the Highlife Collection. From the sculpted shells and Everwood™ HD siding to the jets and other details, these models feature the same quality components and exclusive options.

What makes these spas so special is the **entirely new exterior design.** Through innovative technology we have achieved a distinctive new look – unlike anything else you will find.

Highlife NXT spas feature unique molded corners and an engineered polymeric sub-structure and base pan that together give the impression that the spa is floating, or standing on legs. The exclusive corners and floating effect, paired with other enhancements, make the NXT models look sleeker and more stylish than traditional spas.

The distinct styling of the NXT models includes:

1. Architectural Molded Corners
2. Beautiful Exterior Lighting
3. Large On/Ready Indicator Lights
4. Polymeric Sub-Structure
5. Polymeric Base Pan

Plus, all three models include the exclusive **Wireless Remote Control** and **Tri-X™ filters.**

Polymeric Sub-Structure

The polymeric sub-structure provides structural support, while making it possible to achieve the distinctive floating effect that separates NXT spas from the rest of the Highlife Collection. The polymeric sub-structure frame also increases durability, and helps preserve fit and finish after years of ownership.

Polymeric Base Pan

Made from heavy-duty ABS, the base pan is recessed diagonally at each corner to ultimately create the illusion that the spa is standing on legs. In addition to preventing moisture from wicking into the bottom of the spa, the base pan is engineered with "ribs" that help increase energy efficiency by minimizing contact with the ground.

Large On/Ready Indicator Lights

The perfect accent to the NXT spas, a beveled black acrylic plate prominently displays your spa's status with large On/Ready indicator lights incorporated into the Hot Spring® logo.

Architectural Molded Corners

Unique molded corners provide dramatic architectural styling, and create an elegant waterfall-like effect as the lines of the corner meet the lines of the shell. Each corner features an intricate texture that adds depth and dimension, and is molded in shades that complement the Everwood HD siding options.

Beautiful Exterior Lighting

Multi-colour LED lights illuminate the spa at each corner. The exterior lighting is controlled independently and can be adjusted for colour and brightness. Set the lights to automatically turn on and off at the same time each evening to create a beautiful focal point in the back garden.

The Highlife® Collection Difference

As a result of our ongoing commitment to developing leading-edge technology, the Highlife Collection and NXT spas offer an unparalleled experience. Exclusive innovations in massage, energy-efficiency, and water care make your Highlife Collection spa easy to own and operate so you will use it often. Owning a spa is an investment in your wellness, and with features like these, spending time in your Hot Spring® spa will quickly become a favourite part of your daily ritual.

Exclusive Moto-Massage™ DX Jet

The original Moto-Massage jet was the first-ever moving spa jet. Today we are proud to offer the next generation of this revolutionary jet – the Moto-Massage DX. This innovative jet creates two powerful streams of warm water sweeping up and down the length of your back. There is simply nothing like it.

EnergySmart™ Spas

We consider every possible way to efficiently create and keep heat locked in the spa – which helps ensure operating costs are as low as possible. Highlife Collection spas feature our complete EnergySmart system, which makes them super energy efficient.

- Highlife Collection spas are totally insulated with multiple layers of foam insulation
- Our No-Fault™ heater maximises heat transfer and is covered by an unconditional 5-year limited warranty.
- The SilentFlo™ 5000 circulation pump constantly circulates water using less energy than a 40-watt light bulb
- Certified to the stringent California Energy Commission (CEC) standards, as well as to the national energy efficiency standard for portable spas, APSP 14
- We manufacture our own spa covers to ensure a custom fit and tight seal that locks in heat

ACE®
Salt Water Sanitising System

ACE® Salt Water System

Owning a Hot Spring spa has never been easier. Enjoy peace of mind knowing your spa water is being sanitised, even when you haven't given water care a thought. With the revolutionary ACE salt water system:

- A patented diamond electrode produces powerful oxidisers
- Cleaners are generated automatically from salt and water
- Water looks great, feels great, and even smells great

100% No-Bypass Filtration

Only Highlife Collection spas offer 100% No-Bypass Filtration, and up to the equivalent of a 30 m² effective filtration area with exclusive, dishwasher-safe Tri-X™ filters.

The filtration area is matched to the power of the jet pumps, so 100% of the water can pass through the filters 100% of the time – even when the jets are on, which is when other spas by-pass the filters and when you need filtered water the most.

The Absolute Best Hot Tub Ownership Experience™

Your Local Dealer

As a Hot Spring® owner, you can count on our experienced and knowledgeable Hot Spring dealers to provide unparalleled customer care. Hot Spring dealers are committed to providing you with the best hot tub experience possible, from finding the right spa model to the years of enjoyment that come with spa ownership. With over 900 worldwide sales and service centers in over 70 countries, there is a Hot Spring dealer nearby who can help answer any questions you have along the way.

Commitment to Quality

With Hot Spring, you can count on quality that is made to last. In addition to helpful service from our team of retailers, each of our spas comes with a comprehensive warranty backed by a manufacturer you can trust. Hot Spring sells more hot tubs than any other brand worldwide and remains committed to standing behind our products and customers.

“I couldn’t remember the last time I had taken the time to enjoy the view. Then I realised . . . my whole family was with me. And they were making eye contact and talking together. Amazing.”
